

Projekt Aegis User Guide

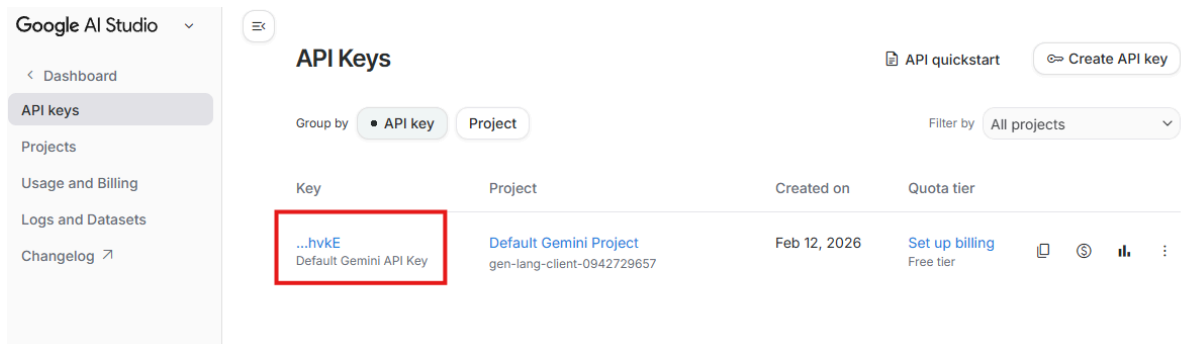

Q: I want to just have a try for an AI Agent. How to get a free API token?

A: Option 1: Google Gemini, they have a free tier token to play with.

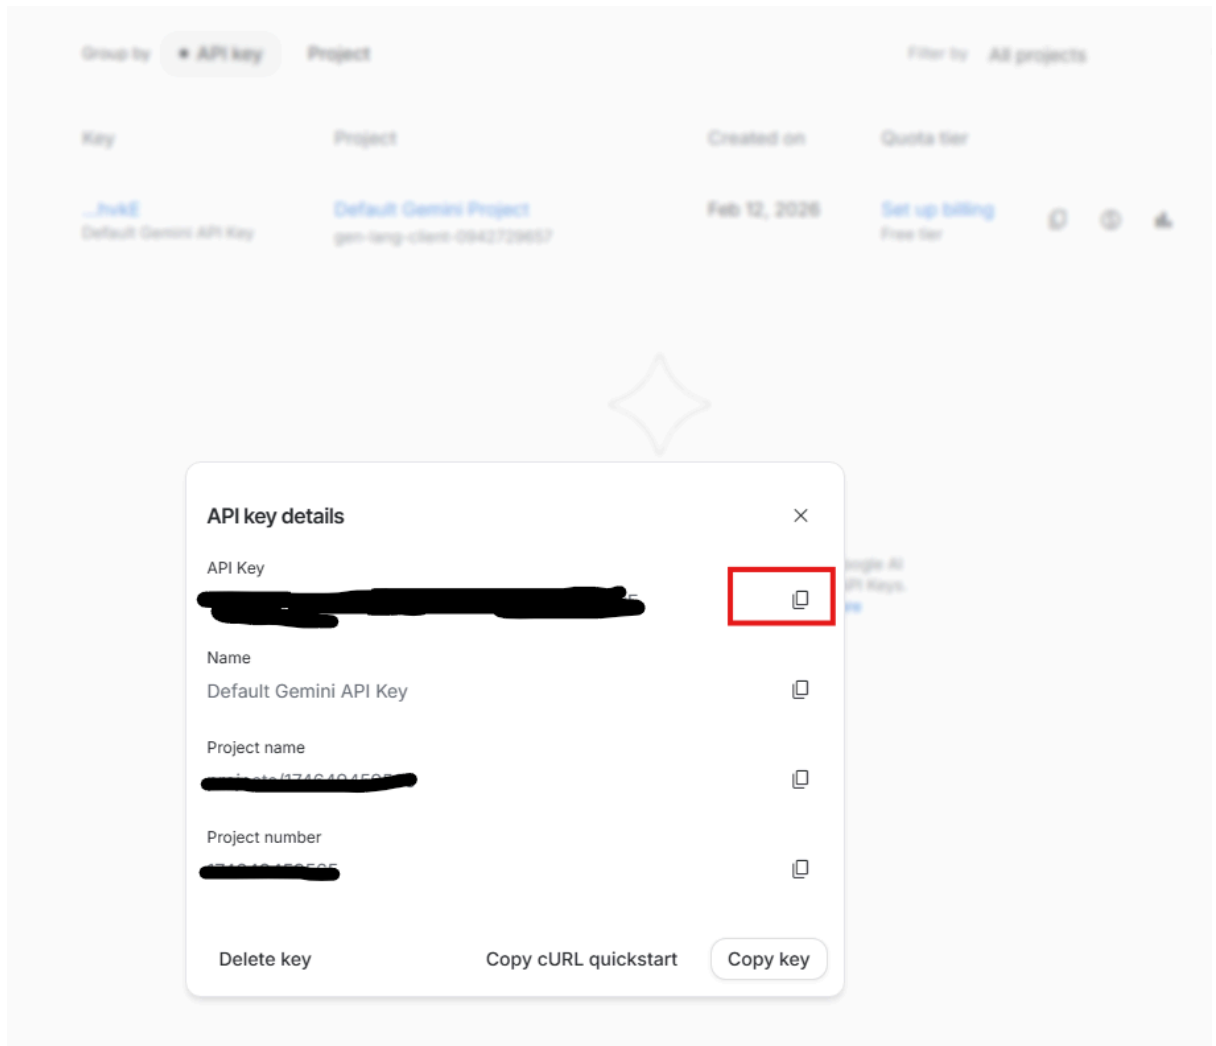

1. Go to <https://aistudio.google.com/app/api-keys>, login with your Google account

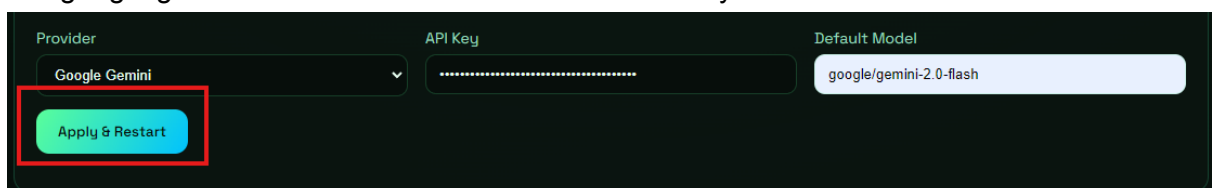

2. Press here:

3. Click this to copy the API key:

4. Paste your API Key into your Aegis dashboard, select Google Gemini as the provider and google/gemini-2.0-flash as the Default model. And you are all set!

5. Remember, the free tier Gemini API has a use limit, so if you want to have the best experience, subscribe to some of the plans out there(not going to do free ads 😊) !
